RE: SOLAR CAPACITY AND ENERGY

The Town of Front Royal, through GDS Associates, issued a Request for Proposal to obtain Solar Capacity and Energy, with the deadline for receipt of proposals set for January 22, 2010 at 5:00 P.M.. GDS Associates received 36 responses to this proposal, and on March 15, 2010, appeared before the Front Royal Town Council with the results.

We regret to inform you that per Section 2.2-4319 (A) of the Code of Virginia, and by Resolution of the Front Royal Town Council during their April 12, 2010 meeting, all proposals to the above mentioned project have been rejected.

The proposed prices per megawatt hour of electricity were more than the Town expected, and far more than the Town currently pays for coal-fired generated electricity. This extra expense would place a burden on the Town's electric customers.

Thank you for your interest and in the Town of Front Royal. We appreciate the time and effort you put into your submittal.

Sincerely,

Cynthia A. Hartman
